GENERAL CONSENT

Thank you for choosing our office for your dental care. We will work with you to help you achieve excellent oral health. While recognizing the benefits of a pleasing smile and teeth that function well, you should be aware that dental treatment, like treatment of any other part of the body, may have some inherent risks.

These risks are seldom great enough to offset the benefits of treatment, but should be considered when making treatment decisions.

Benefits of dental treatment can include: relief of pain, the ability to chew properly, and the confidence and social interaction that a pleasing smile can bring. Nonetheless, there are some common risks associated with virtually any dental procedure, including:

1. **Drug or chemical reaction.** Dental materials and medications may trigger allergic or sensitivity reactions.
2. **Long-term numbness (paresthesia).** Local anesthetic, or its administration, while almost always adequate to allow comfortable care, can result in transient, or in rare instances, permanent numbness.
3. **Muscle or joint tenderness.** Holding one's mouth open can result in muscle or jaw joint tenderness, or in a predisposed patient, precipitate a TMJ disorder.
4. **Sensitivity in teeth or gums, infection, or bleeding.**
5. **Swallowing or inhaling small objects.**

While we follow procedural guidelines, which most often lead to clinical success, there are occasional cases, as in any medical treatment, that do not turn out as planned. We will do our best to assure that it does. Please feel free to ask questions in regard to all dental procedures that are recommended to you.

THANK YOU FOR READING THE GENERAL CONSENT AND OUR FINANCIAL POLICY. LET US KNOW IF YOU HAVE ANY QUESTIONS OR CONCERNS.
